</table>

P. 9 Choice of two algorithms (find the algorithms on a program you might have written, show the code you have used.)

On this example please take a screenshot and write what it is doing and why you decided to use it.

P. 10 Example of Pseudocode

Evidence for unit

P. 11 Github link to one of your projects

Evidence for unit

P. 12   Screenshot of your planning and the different stages of development to show changes.

Evidence for unit

P. 13 User input

Evidence for unit

Make sure you show the input being added.

P. 14 Interaction with data persistence

Evidence for unit

P. 15 User output result

Evidence for unit

P. 16 Bug tracking report showing the errors diagnosed and corrected.

Evidence for unit

P. 17 Testing your program

Show the test code, the test not passing…..and then the test fixed.
